DRIVEN BY NATURE.

Real beauty starts from the inside, that's why the Fiat 500 comes with a mild-hybrid engine that reduces emissions providing lower consumption and a better driving experience. This technology provides an assist during the acceleration to enhance the driving pleasure (E-ASSIST). This is possible thanks to a 12v lithium battery that is recharged during deceleration (E-COASTING) and braking (E-BREAKING) without any other support needed. Plus, there's also the LPG engine an alternative solution equally convenient.
